

**Exchange**  
**NEWS ROOM**

The undersigned having purchased from Mr. Heisterman the Goodwill of the above named institution, asks from the Subscribers and the inhabitants of Victoria and its vicinity, their liberal patronage and support, and begs to assure them that his utmost endeavors will be used to make the room as attractive as possible.

He depends greatly upon the kind assistance of his friends and patrons to consummate that object.

By increasing and improving the Library the Ladies of Victoria will be enabled to participate in the advantages of the institution. And to attain that, immediate arrangements will be made for obtaining all the new literary works of the United Kingdom, Europe and America.

CHRISTOPHER LOAT,  
Victoria, V. I., 1st June, 1863.

**BALLARAT HOTEL,**  
(LATE ST. JAMES),  
Government st., cor. Broughton.  
VICTORIA, V. I.

**M. METZGER,**

## AUCTION SALES TO-DAY.

J. A. MURPHY will sell at 11 o'clock, a.m., at Sale, a Special Trade Sale of Wines, Liqueurs, and Port, consisting of Jamaica Rum, French Brandy, Old Tom, Port Wine, Sherry Wine, Bottled Ale, Whiskey, Brandy, Liqueurs, Gin, also at commencement of Sale, Flour, Pot, Beef, Hams, Bacon, Butter, Gunpowder, Hops, Dried Apples.

## ARRIVAL OF THE CALEDONIA.

The steamer Caledonia arrived last night from New Westminster with about 50 passengers and considerable treasure, mostly in private hands.

Several passengers left Williams Creek on the 15th inst., but the intelligence brought by them is devoid of interest.

Fraser River has risen.

Efforts to search for the lost Yale express had been discontinued, but it was believed that the bag was lying between some boulders and would be recovered.

Judge Ball had proceeded to the reported diggings discovered in the Shuswap district.

The Exhibition.—We would remind our readers of the annual exhibition of the Agricultural and Horticultural Society, to be held to-day on the grounds adjoining the residence of the Colonial Secretary, James' Bay. Unusual preparations have been made for the accommodation of exhibitors and visitors, and the display of stock, produce, and other articles is expected to exceed that of any previous year. The exhibition grounds will doubtless be crowded by the elite of the island, and every one should consider it a duty as well as a pleasure to encourage by their presence the efforts of the exhibitors, and to witness the display of the fruits of the soil, and the industry of the people, and also the laudable ambition of the aspirants for prizes. The proceedings of the day will be terminated, as usual, by a dinner, to be held at the St. George Hotel, at 6.30 p.m.

ELITE-OROLOGICAL.—Among the gifts bestowed yesterday by the Songish Tylices to their "fillicums" was a tenasis Ellice, or young female slave, whose retail price was considered equivalent to fifty blankets. Instead of pitching the young girl from the roof of one of their tenements, as was done with most of the other gifts, a long pole was cast over a substitute, among other things, and the girl was thrown overboard, and was seen to be struggling and kicking in the water.

PLUGHING MATCH.—We understand that there was no competition yesterday for the ploughing match, no competitors having presented themselves.

FOR THE SOUND.—The barkentine Monitor cleared and sailed yesterday for the Sound to load lumber for San Francisco.

FROM PORT TOWNSEND.—The ship Catherine Alexander, arrived yesterday with passengers from the Sound.

OMISSIO.—We omitted to notice the presence of Mr. Carswell at the House of Assembly on Monday.

Correspondence between Generals Gilmore and Beauregard at Charleston.

A correspondent of the New York Herald writes that an interesting correspondence recently passed between Generals Gilmore and Beauregard at Charleston.

BEAUREGARD TO GILMORE.

On the 4th of July last Gen. Beauregard wrote that it was his duty, in the interests of humanity, to inform Gen. Gilmore with a view of effecting some understanding as to the future conduct of the war in that quarter. After alluding to the expedition of Gen. Hunter to the Combahee river, which seized upon the plantations of the planters, etc., he says he does not propose to enter upon a discussion touching that species of pillaging, but desires to acquit Gen. Gilmore of the charge of pillaging, and that, in conclusion, he asks whether the acts which resulted in the burning of the villages of Darien and Bluffton, and the ravages on the Combahee, are regarded by Gen. Gilmore as legitimate measures of war, which he will feel authorized to resort to hereafter. He forwarded accounts taken from Northern papers, of the raids on Darien, Bluffton, Combahee, etc.

ANSWER BY GILMORE.

Gen. Gilmore replied, under date of July 18th, and acknowledges the receipt of Gen. Beauregard's communication of July 4th, written with a view of effecting some understanding as to the future conduct of the war in that quarter. He says that while he and his Government will scrupulously endeavor to conduct the war upon principles established by usage among civilized nations, he shall expect from the commanding general, on the part of the Union, to observe the same rules, in their unrestricted application, to all the forces under his command. In conclusion, after expressing his surprise that Beauregard should choose the navy as a client for his services, he commends him with him, when the opposing pickets on Morris Island are within speaking distance, he desires that hereafter all communications be sent to him through his own lines, and not by way of the blockading fleet.

HOSPITAL BENEFIT.—Mr. Marsh has, it will be seen, with most commendable generosity offered to devote the whole of the proceeds of the performance of his talented troupe to-morrow evening to the funds of the Royal Hospital. This valuable institution is greatly in want of support, and the augmentation which the funds will receive from this source will be most opportune. Mr. Marsh may justly expect that the public will recognize his good intentions by turning out in numbers on that occasion.

LYCERUM.—This place of entertainment was nearly as crowded last evening as on the opening night. The musical performances and Ethiopian delineations received loud demonstrations of satisfaction from the audience, and Harry Courtaine again produced roars of laughter by his inimitable delineations of Hibernian character in the amusing afterpiece entitled "Kiss your Father."

NEW LADIES' SCHOOL.—We would call the attention of the public to the school for young ladies just established by Miss Faussett on Douglas street adjoining the Anglo-American Hotel. Miss F. possesses good recommendations and will doubtless secure a fair share of patronage.

ACCIDENT.—A laborer named Wm. Dougherty, while undermining a rock yesterday morning on the Cadboro Road near Mr. Tod's farm, unfortunately had his ankle joint broken by the fall of the rock before it was expected. The sufferer was conveyed to the Hospital.

FROM COWICHAN.—The sloop Louise, King, arrived on Monday night from Cowichan. She brings no news with the exception that some settlers were devoting their road labor towards the construction of a bridge over the Cockosias River, which was recently completed.

DUES OVER.—Henry Dirk was yesterday charged before Mr. Pemberton with threatening Edwin Hall, and was ordered to furnish his own recognisance for £20 with two sureties in £10 each to keep the peace for six months, or to suffer one month's imprisonment.

NAMED STEALING.—The Bella Bella Indian named Charley, charged with stealing a horse and bridle from Finlayson's farm, the property of Louis Culverau, was again remanded yesterday in the police court.

FROM NANAIMO.—The sloop Hamley and schooner Industry arrived yesterday with cargoes of coal from Nanaimo.

FOR NEW WESTMINSTER.—The steamer Otter left yesterday morning with passengers and freight for New Westminster.

FROM ALBERTA.—The steamer Thames on entering the harbor last evening from Albion, grounded on the Beaver Hook.

The charge against Milberry Day has been dismissed.

## INDIAN REJOICINGS.—The weather yesterday was fine and the crowds of Indians now collected on the Reserve were all out of doors amusing themselves in various ways.

Considerable potlatching went on during the forenoon, but to-day is to be the grand display. Jim, alias Skoming, whose wealth has raised him to an equal position with handsome King Frexy, will distribute about 400 blankets among his friends, and at 1 p.m. the whole of the Chiefs are invited to attend at the Indian school on the Reserve, where the Rev. Mr. Garrett will regale them with a copious supply of rice and molasses. Among the incidents was the bestowal of the gifts of an orphan girl, daughter of a Songish chief, by a Clalam wife. The donor, a rather good looking Indian woman, was decked out in the most approved Siwash style, being covered from head to foot with rows of fringes spun from the wool of the mountain sheep. The first portion covered her head and shoulders, below this was a tippet of the same material reaching to her waist, from which depended the kittle which completed her attire. If nothing in accordance with Indian etiquette that the maid should present her elderly friends do so for her. Next came an old swash, who spoke of the deeds of her father and the condition of the daughter. King Frexy then showed for five of the chief men of the Songish who came forward accordingly. A cap ornamented with silk ribbons was then thrown to one of them who placed it upon a first class by. Some blankets were then thrown down, and the song of the young men was sung in chorus. The singing and giving away blankets followed each other alternately several times, when the whole concluded by the young woman going through a short dance to the music of her surrounding friends.

OUT OF THE FRYING-PAN INTO THE FIRE.—We learn from the master of the ship Catherine Alexander, that the steamer Eliza Anderson was again seized on her arrival at Port Angeles; she lay for three or four hours on Saturday last under the guns of the Lane, and eventually two Custom-house officers were placed on board, and she was allowed to proceed up the sound. She was expected back yesterday.

NEW FERRY.—Mr. S. Harris, of Cowichan, writes to Messrs. Plaskett & Glyde that he and other settlers are prepared to start a ferry from Cowichan to North Saanich, connecting with their stages. This will render the present route much easier and more pleasant to travel.

PLUGHING MATCH.—We understand that there was no competition yesterday for the ploughing match, no competitors having presented themselves.

FOR THE SOUND.—The barkentine Monitor cleared and sailed yesterday for the Sound to load lumber for San Francisco.

FROM PORT TOWNSEND.—The ship Catherine Alexander, arrived yesterday with passengers from the Sound.

OMISSIO.—We omitted to notice the presence of Mr. Carswell at the House of Assembly on Monday.

Correspondence between Generals Gilmore and Beauregard at Charleston.

A correspondent of the New York Herald writes that an interesting correspondence recently passed between Generals Gilmore and Beauregard at Charleston.

BEAUREGARD TO GILMORE.

On the 4th of July last Gen. Beauregard wrote that it was his duty, in the interests of humanity, to inform Gen. Gilmore with a view of effecting some understanding as to the future conduct of the war in that quarter. After alluding to the expedition of Gen. Hunter to the Combahee river, which seized upon the plantations of the planters, etc., he says he does not propose to enter upon a discussion touching that species of pillaging, but desires to acquit Gen. FROM NANAIMO.—The sloop Hamley and schooner Industry arrived yesterday with cargoes of coal from Nanaimo.

FOR NEW WESTMINSTER.—The steamer Otter left yesterday morning with passengers and freight for New Westminster.

FROM ALBERTA.—The steamer Thames on entering the harbor last evening from Albion, grounded on the Beaver Hook.

The charge against Milberry Day has been dismissed.

of three. Gen. Gilmore also states that the request to bury his own dead was refused, and that his (Gilmore's) batteries were silent on the following day because his (out) wounded could be seen lying exposed the entire day outside the fort.

## Varieties.

How near an infant laughter is to tears was shown when Rubie, with a single stroke of his brush, turned a laughing child in a painting to one crying; and our mothers, without being great painters, have often brought us, in like manner from joy to grief by a single stroke.

A Yankee has invented a medicine to remove a boil from a tea kettle.

The individual who "stood upon his own responsibility," is to be indicted for infanticide.

"I'll make every inquiry" as the lady's maid remarked, when she looked into the letter of the young mistress.

Who was the first whistler, and what time did he whistle? The wind—"Over the Hills and Far Away."

"Did you not observe the scraper at the door, sir?" exclaimed an offended spinster, staid, tidy, and discreet, to a man who had entered the house without removing his boots.

"Yes, mem," said he; "and I intend using it when I go out."

If you would have your son be something in the world, teach him to depend on himself. Let him learn that it is by his own strenuous application he must rise—that he must, in short, make himself, and be the architect of his own fortune.

A poet was walking with M. de Talleyrand in the street, and at the same time reciting some of his own songs of yesterday evening. A short distance a man yawning, pointed him to his friend, saying, "Not so loud; he hears you."

We only ask of God what we think will be best, but he gives us what he knows will be best.

"Doctor, do you think tight lacing is bad for consumption?"—"Not at all, madam—it is what it lives on."

Young Doves married fair Miss Dow, who brought him many little Doves, but ah! no dove.

Manners are of more importance than laws; even then in a great measure the law depends. The law touches us but here and there, now and then. Manners are what vex or soothe, corrupt or purify, exalt or debase, barbarize or refine us, by a constant, silently, unobtrusive, imperceptible operation, that of their air we breathe in. They give their whole form and color to our lives. According to their quality, they aid morals—they supply them, or they totally destroy them.

When some one was lamenting Foster's unluckiness fate in being kicked in Dublin, Johnson said he was glad of it. "He is rising in the world," added he; "when he was in England, no one thought it worth while to kick him."

HUMORS OF A SEA VOYAGE.—The last trip of the bark Yankee from Honolulu to this port was rather dull for the lack of favorable winds, and some of the passengers amused themselves by getting up an illustrated manuscript newspaper, called the *Yankee Clipper*. A copy of it is before us. The editor commences with the *Yankee Clipper* is down, but he has received some important Eastern news by the submarine Porpoise line. The paper contains pretty, notices of deaths, and advertisements, like printed journals. One of the advertisements is signed by "Patty, who gives notice that he has lost a six-knot breeze, and will pay for its return to him. Among the notices of deaths is the following: "Yesterday, at 12 m., of cook's complaint, a species of hermitage, of the three-a-fellow-passenger, much esteemed for his chops, but a very sheepish acquaintance. His remains will be laid out in state in the main cabin dining saloon, at 3 p.m. Friday. Capt. Patty will do the honors on the occasion."—*V. Paper.*

BLUE EYES V. BLACK.—Among the memorabilia of the War of 1861-62, the eyes of the blue-eyed men. If true, this will go far to establish the inferior practical usefulness of dark eyes, just as their comparative moral qualities were depreciated years ago by Dr. S. who wrote, "Men with grey eyes are generally keen, energetic, and at first cold; but you may depend upon their sympathy with real sorrow." If light-eyed men are more quick-sighted, they are also more keen, energetic and benevolent, who would not be fair? Lord Elcho, Lord Bury, Mr. Popping, and other crack shots, have all eyes of the favorite color.

LADIES' SPELLING A HUNDRED YEARS AGO.—Mr. Murphy used to relate the following story of Sam Pootie, the heroines of which were the Ladies Chere, Fielding, and Hill, the last the wife of the celebrated Dr. Hill. He represented them as playing at "I love my love with a letter."—"Lady Chere began and said, 'I love my love with an N, because he is a knight.'"—"Lady Fielding followed with, 'I love my love with a G, because he is a gestic.'"—"Lady Hill followed with, 'I love my love with an F, said Lady Hill, 'I love my love is a fishman.'"

MRS. PARTINGTON ON COSMETICS.—That's a new article for beautifying the complexion, said Mr. Bibb, holding up a small bottle for Mrs. Partington to look at. "Is it, indeed?" said she? "Well they may get up over so many for beautifying the complexion, but depend upon it, the less people have to do with bottles for it, the better. My neighbor Mrs. Bloch, has been using a bottle for a good many years for her complexion, and her nose looks like a rupture of Mount Vesuvius, with the burning hair running all over the contagious territory."

Mrs. Partington is delighted that our Prince Alfred would have nothing to do with Foreign Greece. She says she always thought he had much better stick to his native Isle.

BRISTOL'S SASSAPARILLA.—Multitudes of bogus Sarsaparilla are sold for a brief season, by desperate and unscrupulous parties, who have fallen like the extinguished sticks of rockets since this grand specific dawned upon mankind. For thirty odd years its course has been over the wrecks of humbug competitors, called into a brief existence by peerless success. It has been on the trail of disease wherever and in whatever shape it was to be found, and its course has been marked by the most wonderful cures that have ever shined upon the healing art. Scrofula, liver disease, remittent and intermittent fever, dyspepsia, neuralgia, and all ulcers, and cancerous disorders yield to its marvellous properties as surely as effect follows cause. All the leading druggists keep it.

FEVER AND AGUE.—ANTONISHING CURES.—Dr. Egbert Simms, formerly of the Medical College, Philadelphia, and now one of the most prominent physicians in Minnesota, writes to a friend in New York, that Bristol's Sugar-coated Pills are working wonders in that region, in cases of Fever and Ague, and Bilious Remittent Fever. The following extracts from his remarks is published by permission of the gentleman to whom the letter was addressed. "I am not as you know, a devotee of advertised pills. Most of them are worthless, some dangerous. But Bristol's SUGAR-COATED PILLS are an exception. No better family cathartic could be desired. There is nothing in the pharmacopoeia, as far as I am aware, that is equal to them. Nor is this all; the antibilious properties of the pills, exert them a positively reliable medicine for the bilious remittent and intermittent fevers so common in this region. I have found them exceedingly efficacious in ague and fever. They are tonic as well as aperient, and may be given, with great benefit, in cases where drastic purgatives would be dangerous. They are put up in glass vials, and will keep in any climate. Sold by druggists everywhere."

STRAINING IS HURTFUL. STRAINING IS HURTFUL. STRAINING IS HURTFUL.

Cramps, Spasms, wrenching pains attending an evacuation from the bowels, from a dose of medicine, is proof that the medicine thus taken is injurious. It is not the quantity of force expelled that causes pain. Pills and purgative medicines of almost all kinds, and of almost all kinds, cause pain, inasmuch as purgation from these obnoxious drugs is induced only from the irritation they produce on the mucous membrane. They have no influence on the liver or chyle, but are carried to the lower bowels, and by their irritation evoke an evacuation. Dr. Radway's Pills are the only safe purgative to take. These pills are set on the liver, and exert their action, hence in their operation no straining or wrenching pains follow; the stools, instead of being thin and watery, are natural; it is the absence of the diseased humors that these imperfect pills fail to eliminate from the blood, that causes that watery evacuation; and hence the evacuations from these drastic cathartics are not purgative, inasmuch as purgation from these obnoxious drugs is induced only from the irritation they produce on the mucous membrane. They have no influence on the liver or chyle, but are carried to the lower bowels, and by their irritation evoke an evacuation. Dr. Radway's Pills are the only safe purgative to take. These pills are set on the liver, and exert their action, hence in their operation no straining or wrenching pains follow; the stools, instead of being thin and watery, are natural; it is the absence of the diseased humors that these imperfect pills fail to eliminate from the blood, that causes that watery evacuation; and hence the evacuations from these drastic cathartics are not purgative, inasmuch as purgation from these obnoxious drugs is induced only from the irritation they produce on the mucous membrane. They have no influence on the liver or chyle, but are carried to the lower bowels, and by their irritation evoke an evacuation. Dr. Radway's Pills are the only safe purgative to take. These pills are set on the liver, and exert their action, hence in their operation no straining or wrenching pains follow; the stools, instead of being thin and watery, are natural; it is the absence of the diseased humors that these imperfect pills fail to eliminate from the blood, that causes that watery evacuation; and hence the evacuations from these drastic cathartics are not purgative, inasmuch as purgation from these obnoxious drugs is induced only from the irritation they produce on the mucous membrane.
